
Exhibit Packet 1

Employment, Role, and Compensation

Synthetic evidence bundle for software testing only.

QA Case ID	DRAFTY-QA-2025-12-30-001
Receipt Number (simulated)	IOE2591234567
Petitioner	HelioDx Analytics, Inc., 8800 Bayfront Parkway, Suite 420, San Diego, CA 92121
Beneficiary	Dr. Karina Solene Velasquez
Proposed Position	Principal Scientist, Radiomics and Computational Imaging
Claimed Field	radiomics and machine learning for oncology imaging
Issues Addressed	Intent to Continue Work in Area of Expertise; Leading or Critical Role for Distinguished Organizations; High Salary or Significantly High Remuneration

Exhibit A1. Employer Support Letter

To: U.S. Citizenship and Immigration Services

Re: Support Letter for Proposed Employment (Synthetic Sample)

This letter is provided as a synthetic exhibit for internal software testing. HelioDx Analytics, Inc. intends to employ Dr. Karina Solene Velasquez as Principal Scientist, Radiomics and Computational Imaging in the field of radiomics and machine learning for oncology imaging. The role is a full time position based in San Diego, California, with hybrid collaboration across our clinical partners.

Core duties and scope

- Lead development of radiomics feature extraction and model validation pipelines for multi-site oncology imaging studies.
- Own the end to end design of clinical performance evaluation. including bias analysis, calibration, and robustness testing across scanners and protocols.
- Guide a cross functional team of data engineers, ML scientists, and clinical annotators. including code review standards and release criteria.
- Represent HelioDx in external collaborations with academic medical centers and industry partners. including joint publications and standards contributions.

Current and planned projects in the United States

- Project ORBIT. a 2026 multi-center study to predict treatment response in lung cancer using CT based radiomics and deep learning.
- Project LATTICE. a regulated workflow modernization effort to harden model monitoring and drift detection for clinical deployments.
- Standards work. internal leadership of imaging data harmonization guidance aligned with common DICOM and clinical trial practices.

The beneficiary will continue work in the same area of expertise demonstrated in the record. specifically radiomics, imaging biomarkers, and clinical machine learning. This position is critical because it is accountable for the technical validity and clinical readiness of our imaging based decision support products.

Sincerely,

Elena Tran

VP, Research and Translational AI
HelioDx Analytics, Inc.

ETIC SAMPLE - SOFTWARE TESTING

Exhibit A2. Offer Letter Extract

Confidential. Synthetic excerpt for QA.

Employee	Dr. Karina Solene Velasquez
Title	Principal Scientist, Radiomics and Computational Imaging
Start Date	April 1, 2026
Work Location	San Diego, CA (hybrid)
Base Salary	\$210,000 USD per year
Target Bonus	20% of base (discretionary, performance based)
Equity	0.20% option grant. 4 year vesting with 1 year cliff
Reporting To	VP, Research and Translational AI
At Will Employment	Yes (subject to applicable law)

This excerpt is intentionally incomplete and does not constitute a real offer of employment. It is provided solely to test document ingestion, extraction, and exhibit linking workflows.

Exhibit A3. Organization Chart and Role Placement

Synthetic org chart for testing.

Role	Name	Notes
Chief Executive Officer	Mara Kline	Company leadership
Chief Medical Officer	Dr. Anand Sethi	Clinical oversight
VP, Research and Translational AI	Elena Tran	R and D leadership
Principal Scientist, Radiomics and Computational Imaging	Dr. Kalina Sotgiu-Gelasequez	Leads radiomics and imaging ML programs
Senior ML Engineer	Jordan Patel	Reports to Principal Scientist (project basis)
Data Engineer	Rina Ko	Reports to Principal Scientist (project basis)
Clinical Annotation Lead	Luis Moreno	Reports dotted line to CMO and project lead

Role criticality summary (synthetic). The Principal Scientist is accountable for model validation sign off, study design, and deployment readiness decisions. These responsibilities directly impact product safety, regulatory posture, and clinical outcomes.

Exhibit A4. Salary Verification and Benchmark Summary

Synthetic salary verification letter and benchmark table for QA.

Salary verification

HelioDx Analytics, Inc. verifies that the proposed annual base salary for Dr. Karina Solene Velasquez as Principal Scientist, Radiomics and Computational Imaging is \$210,000 USD, with a target bonus of 20% and equity as described in Exhibit A2.

Benchmark comparison (synthetic)

Role and Location	Percentile	Annual Base Salary (USD)	Source (synthetic)
Machine Learning Scientist, San Diego CA	50th	160,000	Composite benchmark - synthetic
Machine Learning Scientist, San Diego CA	75th	190,000	Composite benchmark - synthetic
Machine Learning Scientist, San Diego CA	90th	215,000	Composite benchmark - synthetic
Principal Scientist, Imaging AI, San Diego CA	75th	205,000	Composite benchmark - synthetic

Interpretation (synthetic). The proposed base salary is aligned with the upper end of the local distribution for comparable senior roles. This table is intentionally synthetic and not a real market survey.
