
Exhibit A5

Beneficiary Statement of Plans to Continue Work

Synthetic document for software testing only.

QA Case ID	DRAFTY-QA-2025-12-30-001
Beneficiary	Dr. Karina Solene Velasquez
Issue Addressed	Intent to Continue Work in Area of Expertise

December 30, 2025

Statement

I, Dr. Karina Solene Velasquez, provide this synthetic statement for internal QA testing. If employed by HelioDx Analytics, Inc. as Principal Scientist, Radiomics and Computational Imaging, I intend to continue my work in radiomics and machine learning for oncology imaging. My planned work in the United States focuses on building reliable evaluation, monitoring, and deployment practices for imaging based oncology models.

Planned activities

- Design and lead multi-site validation studies that quantify generalization across hospitals, scanners, and protocols.
- Publish and present evaluation standards and reproducibility checklists for radiomics pipelines.
- Collaborate with clinical partners to deploy models with monitoring for drift, bias, and safety issues.
- Mentor engineers and scientists working on imaging biomarker translation.

This statement is not a real declaration and is not intended for submission to any authority. It exists only to test text extraction and issue linkage logic in Drafty's platform.

Signature (synthetic): /s/ Karina Solene Velasquez
